MINI PROJECT USER REQUIREMENT SPECIFICATION

1. Introduction

- Purpose of the project

The objective of this project is to provide comprehensive recommendations for tourist attractions, dining establishments, accommodations for districts in Karnataka.

- Scope of the project

The scope of this project encompasses the entire geographical area of Karnataka, including some of its districts. It aims to cover a wide range of aspects related to tourism, including:

1. Tourist Attractions: Identifying and recommending popular tourist spots, historical sites, natural wonders, cultural attractions, and other points of interest within each district.

2. Dining Establishments: Suggesting a variety of restaurants, cafes, and eateries offering local and diverse cuisines to cater to the culinary preferences of travelers.

3. Accommodations: Providing options for different types of lodging such as hotels, resorts, guesthouses, and homestays, suitable for various budgets and preferences.

The project's scope is comprehensive, aiming to assist tourists in planning their visit to Karnataka especially Mysore by providing detailed

recommendations for a fulfilling travel experience across some of its districts.

2. Project Description

- Project overview

Research: Thorough research will be conducted to identify and verify tourist attractions, dining establishments, accommodations in some district. This will involve online resources, official websites, local experts, and on-site visits where possible.

Content Creation: Engaging and informative content will be generated for each district, including descriptions, photographs, operating hours, pricing details, and contact information for attractions, eateries, and lodgings.

User-Friendly Interface: The project will develop a user-friendly website or mobile application to present the information in an organized and easily navigable format, allowing users to search, filter, and plan their itineraries efficiently.

Regular Updates: To ensure the guide's accuracy, it will be periodically updated to reflect changes in operating hours, new attractions, restaurant openings.

- Major project functionalities

the major project functionalities for the objective of providing comprehensive recommendations for tourist attractions, dining establishments, accommodations for some districts in Karnataka:

District Selection: Allow users to choose a specific district within Karnataka to explore recommendations tailored to that area.

Tourist Attractions: Provide detailed information about tourist attractions, including descriptions, historical context, opening hours, entry fees, and visitor reviews.

Dining Recommendations: Offer a curated list of dining options, including restaurants, cafes, street food vendors, and specialty cuisines, with details like menus, price ranges, and user ratings.

Accommodation Options: Present a range of lodging choices, such as hotels, resorts, homestays, and guesthouses, along with information on room rates, amenities, and user reviews.

3. System Features and Function Requirements

System Feature 1: User Registration and Authentication

- **Description:** This feature allows users to create accounts, log in, and manage their profiles.

Functional Requirements:

- Users must provide a unique UserID (Primary Key) during registration.
- Users need to set a unique Username.
- Users must create a secure Password for their account.
- Users should provide a valid Email address for account verification.
- Users can set their Preferences related to travel interests.

System Feature 2: Place Information Management

Description: This feature involves managing information about different places, including tourist spots and restaurants.

Functional Requirements:

- Places are identified by a unique PlaceID (Primary Key).
- Each place has a PlaceName.
- The Location of each place is specified using address.

System Feature 3: Hotel Information Management

Description: This feature focuses on managing information about hotels.

Functional Requirements:

- Hotels are identified by a unique HotelID (Primary Key).
- Each hotel has a HotelName.
- The Location of each hotel is specified using latitude and longitude coordinates.
- A Rating reflects user reviews and ratings.
- The Price per Night indicates the cost of staying at the hotel..
- Each hotel is associated with a PlaceID (Foreign Key) to link it to a specific place.

System Feature 4: Tourist Spot Information Management

Description: This feature deals with managing information about tourist spots.

Functional Requirements:

- Tourist spots are identified by a unique SpotID (Primary Key).
- Each spot has a SpotName.
- The Location of each spot is specified using latitude and longitude coordinates.
- The Entry Fee indicates the cost of visiting the spot.
- Opening Hours specify when the spot is accessible.

- Each spot is associated with a PlaceID (Foreign Key) to link it to a specific place.

System Feature 5: Restaurant Information Management

Description: This feature involves managing information about restaurants.

Functional Requirements:

- Restaurants are identified by a unique RestaurantID (Primary Key).
- Each restaurant has a RestaurantName.
- The Location of each restaurant is specified using latitude and longitude coordinates.
- A Rating reflects user reviews and ratings.
- Each Restaurant is associated with a PlaceID (Foreign Key) to link it to a specific place.
